

I have been a charter member of XM Satellite Radio nearly since its onset and as a professional driver I enjoy knowing the traffic and weather situation on a moments notice. I can't afford to wait for the local radio stations to produce traffic conditions and weather because you are not always sure which one is going to give you the information you need to know to make an informed decision as to route or detours taken to expedite delivery of my truck freight. Please have Satellite radio improve their coverage to include more major cities. Currently I am looking for the twin cities ie St Paul and Minneapolis, MN area for traffic but it is not available. Thanks for hearing my plea.
